

# Winetricks

[Winetricks](#) is a script meant to configure wineprefixes<sup>1)</sup>. It is sometimes necessary to run Windows based games on Wine with additional dependencies that might get missed and therefore have to be added first manually by using Winetricks. Basically, with Winetricks, you can add those missing dependencies manually into an according existing wineprefix. Batocera has implemented Winetricks natively.

Note that every Windows game *might* have different missing dependencies when running on Wine. Therefore it is necessary to find out what additional dependencies (if any) are needed to make the according game run successfully on Wine. In most cases, to find out which winetricks to use to make a game run successfully in Wine, requires to search the internet, the [which games section of the Windows games wiki page](#) can be a start, however, sometimes the game will report a missing *dll*, in which case installing the winetrick containing it might be enough to fix it (for example, if a game complains about `msvcp140.dll` missing, we can see the trick `vcrun2017` contains several *dlls* including that one, installing it can fix that specific issue).

## Usage

The commands for Wine/Winetricks are different on Batocera than on other classic Linux distributions. The syntax for installing a winetrick into a wineprefix is as follows: <sup>2)</sup>

```
batocera-wine windows tricks <absolute-path-to-the-wineprefix> <trick-to-install>
```

Note that you can only install one winetrick after another, so it is necessary to run the command from above multiple times if you have multiple winetricks to install.

## Example

As already mentioned above, it is necessary to find out what dependencies are needed to make a specific Windows game run successfully in Wine. For the game “Giana Sisters: Twisted Dreams” it was reported by different users that they made it run successfully by installing the following two winetricks: `xact` and `wmp9`. Since both winetricks are deprecated on the Wine version installed on Batocera, it's necessary to install other versions of the according winetricks, `xact_x64` and `wmp11` in this case. **Generally, it's always worth a try to install other versions of the according winetricks** if for some reasons Winetricks throws the according error(s)!

In order to find out what winetricks are actually available, navigate to the according [section below](#).

First of all, it is necessary to either get the game's data as an installer or as raw binary files. For this example, the game is not installed on Batocera by using its installer but just copied the game's binaries to the according filesystem path at `/userdata/roms/windows/Giana Sisters - Twisted Dreams.pc` with the according `autorun.cmd` already set up (get more information about the `autorun.cmd` [here](#)). After updating the gamelist via the ES menu, the game accours on the WINE games list. In order to get Batocera creating the according wineprefix, the game has to be started manually once (where all ES specific game settings have to be left on default) via ES. Now the wineprefix is being created on the filesystem automatically at the following path:  
`/userdata/saves/windows/proton/Giana Sisters - Twisted Dreams.pc.wine`  
Be patient while you see the according blue screen, depending on Batocera's hardware it may take a while. Then, as the game is missing some dependencies, it will not start correctly and therefore it should crash and exit back to the ES desktop automatically (which is expected, so don't worry!). If it freezes instead, just exit manually by pressing `Alt + F4` followed by `End Process` on the keyboard (sometimes you have to do it twice):

 End Process

Now, from a remote PC, connect to the Batocera system via [SSH](#) in order to execute the according commands, required to install the missing dependencies via Winetricks.

- First, to let the system become aware of your resolution settings, execute the following command:

```
export DISPLAY=:0.0
```

- Now set the Wine architecure (win32 for 32-bit or win64 for 64-bit) to the according game's architecure, 64-bit in this case:

```
export WINEARCH=win64
```

- Now you need to use `batocera-wine` with the `tricks` command as follows, which will install the first needed winetrick to the game's wineprefix (Note that if you have any whitespaces in your path you have to put the whole path into single quotes as in the following example):

```
batocera-wine windows tricks '/userdata/saves/windows/proton/Giana Sisters - Twisted Dreams.pc.wine' xact_x64
```

Now install the next winetrick:

```
batocera-wine windows tricks '/userdata/saves/windows/proton/Giana Sisters - Twisted Dreams.pc.wine' wmp11
```

In case you run into the following error message...  
`warning: wine cmd.exe /c echo '%AppData%' returned empty string,`

error message ""

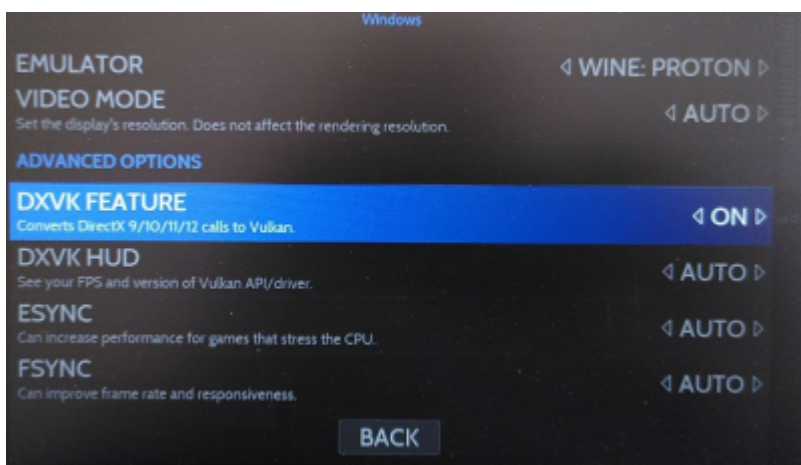

...it means the game is still stuck running somewhere in the background. This happens sometimes when the game gets forced to quit by pressing Alt + F4 followed by End Process as you might have done before. In such case just reboot Batocera by executing...

```
batocera-es-swissknife --reboot
```

...and then try again.

That was mostly it. Now as in Wine this game needs Vulkan in order to call the according DirectX graphics API, it is necessary to enable DXVK FEATURE in the ES game's Advanced Game Settings menu:

DXVK FEATURE

Now start the game via ES and have fun!

## Listing the available winetricks

You can produce this information on your own by executing the following command:

```
/usr/wine/winetricks list-all
```

A static copy is below, last updated

## Winetricks: Apps

- 3m\_library : 3M Cloud Library (3M Company, 2015) [downloadable]
- 7zip : 7-Zip 19.00 (Igor Pavlov, 2019) [downloadable]
- adobe\_diged4 : Adobe Digital Editions 4.5 (Adobe, 2015) [downloadable]
- adobe\_diged : Adobe Digital Editions 1.7 (Adobe, 2011) [downloadable]
- autohotkey : AutoHotKey (autohotkey.org, 2010) [downloadable]

- `busybox` : BusyBox FRP-2121 (Ron Yorston / Busybox authors, 2015) [downloadable]
- `cmake` : CMake 2.8 (Kitware, 2013) [downloadable]
- `colorprofile` : Standard RGB color profile (Microsoft, 2005) [downloadable]
- `controlpad` : MS ActiveX Control Pad (Microsoft, 1997) [downloadable]
- `controlspy` : Control Spy 6 (Microsoft, 2005) [downloadable]
- `dotnet20sdk` : MS .NET 2.0 SDK (Microsoft, 2006) [downloadable]
- `dxsdk_jun2010` : MS DirectX SDK, June 2010 (developers only) (Microsoft, 2010) [downloadable]
- `dxsdk_nov2006` : MS DirectX SDK, November 2006 (developers only) (Microsoft, 2006) [downloadable]
- `emu8086` : emu8086 (emu8086.com, 2015) [downloadable]
- `ev3` : Lego Mindstorms EV3 Home Edition (Lego, 2014) [downloadable]
- `firefox` : Firefox 51.0 (Mozilla, 2017) [downloadable]
- `fontxplorer` : Font Xplorer 1.2.2 (Moon Software, 2001) [downloadable]
- `foobar2000` : foobar2000 v1.4 (Peter Pawlowski, 2018)
- `hhw` : HTML Help Workshop (Microsoft, 2000) [downloadable]
- `iceweasel` : GNU Icecat 31.7.0 (GNU Foundation, 2015) [downloadable]
- `irfanview` : Irfanview (Irfan Skiljan, 2016) [downloadable]
- `kindle` : Amazon Kindle (Amazon, 2017) [downloadable]
- `kobo` : Kobo e-book reader (Kobo, 2011) [downloadable]
- `mingw` : Minimalist GNU for Windows, including GCC for Windows (GNU, 2013) [downloadable]
- `mozillabuild` : Mozilla build environment (Mozilla Foundation, 2015) [downloadable]
- `mpc` : Media Player Classic - Home Cinema (doom9 folks, 2014) [downloadable]
- `mspaint` : MS Paint (Microsoft, 2010) [downloadable]
- `mt4` : Meta Trader 4 (, 2005) [downloadable]
- `njcwptrial` : NJStar Chinese Word Processor trial (NJStar, 2015) [downloadable]
- `njjwptrial` : NJStar Japanese Word Processor trial (NJStar, 2009) [downloadable]
- `nook` : Nook for PC (e-book reader) (Barnes & Noble, 2011) [downloadable]
- `npp` : Notepad++ (Don Ho, 2019) [downloadable]
- `office2003pro` : Microsoft Office 2003 Professional (Microsoft, 2002)
- `office2007pro` : Microsoft Office 2007 Professional (Microsoft, 2006)
- `office2013pro` : Microsoft Office 2013 Professional (Microsoft, 2013) [downloadable]
- `ollydbg110` : OllyDbg (ollydbg.de, 2004) [downloadable]
- `ollydbg200` : OllyDbg (ollydbg.de, 2010) [downloadable]
- `ollydbg201` : OllyDbg (ollydbg.de, 2013) [downloadable]
- `openwatcom` : Open Watcom C/C++ compiler (can compile win16 code!) (Watcom, 2010) [downloadable]
- `protectionid` : Protection ID (CDKILLER & TippeX, 2016)
- `psdk2003` : MS Platform SDK 2003 (Microsoft, 2003) [downloadable]
- `psdkwin71` : MS Windows 7.1 SDK (Microsoft, 2010) [downloadable]
- `psdkwin7` : MS Windows 7 SDK (Microsoft, 2009) [downloadable]
- `qqintl` : QQ International Instant Messenger 2.11 (Tencent, 2014) [downloadable]
- `qq` : QQ 8.9.6 (Chinese chat app) (Tencent, 2017) [downloadable]
- `safari` : Safari (Apple, 2010) [downloadable]
- `sketchup` : SketchUp 8 (Google, 2012) [downloadable]
- `steam` : Steam (Valve, 2010) [downloadable]
- `uplay` : Uplay (Ubisoft, 2013) [downloadable]
- `utorrent3` : µTorrent 3.4 (BitTorrent, 2011) [downloadable]
- `utorrent` : µTorrent 2.2.1 (BitTorrent, 2011)
- `vc2005expresssp1` : MS Visual C++ 2005 Express SP1 (Microsoft, 2007) [downloadable]
- `vc2005express` : MS Visual C++ 2005 Express (Microsoft, 2005) [downloadable]

- `vc2005trial` : MS Visual C++ 2005 Trial (Microsoft, 2005) [downloadable]
- `vc2008express` : MS Visual C++ 2008 Express (Microsoft, 2008) [downloadable]
- `vc2010express` : MS Visual C++ 2010 Express (Microsoft, 2010) [downloadable]
- `vlc` : VLC media player 2.2.1 (VideoLAN, 2015) [downloadable]
- `vstools2019` : MS Visual Studio Build Tools 2019 (Microsoft, 2019) [downloadable]
- `vulkansdk121412` : Vulkan SDK 1.2.141.2 (developers only) (LunarG, 2020) [downloadable]
- `vulkansdk` : Vulkan SDK (latest) (developers only) (LunarG, 2018) [downloadable]
- `winamp` : Winamp (Radionomy (AOL (Nullsoft)), 2013) [downloadable]
- `wme9` : MS Windows Media Encoder 9 (broken in Wine) (Microsoft, 2002) [downloadable]

## Winetricks: benchmarks

- `3dmark03` : 3D Mark 03 (Futuremark, 2003)
- `3dmark05` : 3D Mark 05 (Futuremark, 2005) [downloadable]
- `3dmark06` : 3D Mark 06 (Futuremark, 2006)
- `3dmark2000` : 3DMark2000 (MadOnion.com, 2000) [downloadable]
- `3dmark2001` : 3DMark2001 (MadOnion.com, 2001) [downloadable]
- `stalker_pripyat_bench` : S.T.A.L.K.E.R.: Call of Pripjat benchmark (GSC Game World, 2009)
- `unigine_heaven` : Unigen Heaven 2.1 Benchmark (Unigen, 2010)
- `wglgears` : wglgears (Clinton L. Jeffery, 2005) [downloadable]

## Winetricks: dlls

- `adobeair` : Adobe AIR (Adobe, 2018) [downloadable]
- `allcodecs` : All codecs (dirac, ffdshow, icodecs, cinepak, l3codecx, xvid) except wmp (various, 1995-2009) [downloadable]
- `amstream` : MS amstream.dll (Microsoft, 2011) [downloadable]
- `art2kmin` : MS Access 2007 runtime (Microsoft, 2007) [downloadable]
- `atmlib` : Adobe Type Manager (Adobe, 2009) [downloadable]
- `avifil32` : MS avifil32 (Microsoft, 2004) [downloadable]
- `binkw32` : RAD Game Tools binkw32.dll (RAD Game Tools, Inc., 2000) [downloadable]
- `cabinet` : Microsoft cabinet.dll (Microsoft, 2002) [downloadable]
- `cinepak` : Cinepak Codec (Radius, 1995) [downloadable]
- `cmd` : MS cmd.exe (Microsoft, 2004) [downloadable]
- `cnc_ddraw` : Reimplentation of ddraw for CnC games (CnCNet, 2020) [downloadable]
- `comctl32ocx` : MS comctl32.ocx and mscomctl.ocx, comctl32 wrappers for VB6 (Microsoft, 2012) [downloadable]
- `comctl32` : MS common controls 5.80 (Microsoft, 2001) [downloadable]
- `comdlg32ocx` : Common Dialog ActiveX Control for VB6 (Microsoft, 2012) [downloadable]
- `crypt32` : MS crypt32 (Microsoft, 2004) [downloadable]
- `d3dcompiler_42` : MS d3dcompiler\_42.dll (Microsoft, 2010) [downloadable]
- `d3dcompiler_43` : MS d3dcompiler\_43.dll (Microsoft, 2010) [downloadable]
- `d3dcompiler_47` : MS d3dcompiler\_47.dll (Microsoft, FIXME) [downloadable]
- `d3drm` : MS d3drm.dll (Microsoft, 2010) [downloadable]
- `d3dx10_43` : MS d3dx10\_43.dll (Microsoft, 2010) [downloadable]
- `d3dx10` : MS d3dx10\_???.dll from DirectX user redistributable (Microsoft, 2010) [downloadable]
- `d3dx11_42` : MS d3dx11\_42.dll (Microsoft, 2010) [downloadable]
- `d3dx11_43` : MS d3dx11\_43.dll (Microsoft, 2010) [downloadable]

- d3dx9\_24 : MS d3dx9\_24.dll (Microsoft, 2010) [downloadable]
- d3dx9\_25 : MS d3dx9\_25.dll (Microsoft, 2010) [downloadable]
- d3dx9\_26 : MS d3dx9\_26.dll (Microsoft, 2010) [downloadable]
- d3dx9\_27 : MS d3dx9\_27.dll (Microsoft, 2010) [downloadable]
- d3dx9\_28 : MS d3dx9\_28.dll (Microsoft, 2010) [downloadable]
- d3dx9\_29 : MS d3dx9\_29.dll (Microsoft, 2010) [downloadable]
- d3dx9\_30 : MS d3dx9\_30.dll (Microsoft, 2010) [downloadable]
- d3dx9\_31 : MS d3dx9\_31.dll (Microsoft, 2010) [downloadable]
- d3dx9\_32 : MS d3dx9\_32.dll (Microsoft, 2010) [downloadable]
- d3dx9\_33 : MS d3dx9\_33.dll (Microsoft, 2010) [downloadable]
- d3dx9\_34 : MS d3dx9\_34.dll (Microsoft, 2010) [downloadable]
- d3dx9\_35 : MS d3dx9\_35.dll (Microsoft, 2010) [downloadable]
- d3dx9\_36 : MS d3dx9\_36.dll (Microsoft, 2010) [downloadable]
- d3dx9\_37 : MS d3dx9\_37.dll (Microsoft, 2010) [downloadable]
- d3dx9\_38 : MS d3dx9\_38.dll (Microsoft, 2010) [downloadable]
- d3dx9\_39 : MS d3dx9\_39.dll (Microsoft, 2010) [downloadable]
- d3dx9\_40 : MS d3dx9\_40.dll (Microsoft, 2010) [downloadable]
- d3dx9\_41 : MS d3dx9\_41.dll (Microsoft, 2010) [downloadable]
- d3dx9\_42 : MS d3dx9\_42.dll (Microsoft, 2010) [downloadable]
- d3dx9\_43 : MS d3dx9\_43.dll (Microsoft, 2010) [downloadable]
- d3dx9 : MS d3dx9\_???.dll from DirectX 9 redistributable (Microsoft, 2010) [downloadable]
- d3dxof : MS d3dxof.dll from DirectX user redistributable (Microsoft, 2010) [downloadable]
- d9vk010 : Vulkan-based D3D9/D3D10/D3D11 implementation for Linux / Wine (0.10) (Joshua Ashton, 2019) [downloadable]
- d9vk011 : Vulkan-based D3D9/D3D10/D3D11 implementation for Linux / Wine (0.11) (Joshua Ashton, 2019) [downloadable]
- d9vk012 : Vulkan-based D3D9/D3D10/D3D11 implementation for Linux / Wine (0.12) (Joshua Ashton, 2019) [downloadable]
- d9vk013f : Vulkan-based D3D9/D3D10/D3D11 implementation for Linux / Wine (0.13f) (Joshua Ashton, 2019) [downloadable]
- d9vk013 : Vulkan-based D3D9/D3D10/D3D11 implementation for Linux / Wine (0.13) (Joshua Ashton, 2019) [downloadable]
- d9vk020 : Vulkan-based D3D9/D3D10/D3D11 implementation for Linux / Wine (0.20) (Joshua Ashton, 2019) [downloadable]
- d9vk021 : Vulkan-based D3D9/D3D10/D3D11 implementation for Linux / Wine (0.21) (Joshua Ashton, 2019) [downloadable]
- d9vk022 : Vulkan-based D3D9/D3D10/D3D11 implementation for Linux / Wine (0.22) (Joshua Ashton, 2019) [downloadable]
- d9vk030 : Vulkan-based D3D9/D3D10/D3D11 implementation for Linux / Wine (0.30) (Joshua Ashton, 2019) [downloadable]
- d9vk040 : Vulkan-based D3D9/D3D10/D3D11 implementation for Linux / Wine (0.40.1) (Joshua Ashton, 2019) [downloadable]
- d9vk : Vulkan-based D3D9/D3D10/D3D11 implementation for Linux / Wine (latest) (Joshua Ashton, 2019) [downloadable]
- dbghe lp : MS dbghelp (Microsoft, 2008) [downloadable]
- devenum : MS devenum.dll from DirectX user redistributable (Microsoft, 2010) [downloadable]
- dinput8 : MS DirectInput 8 from DirectX user redistributable (Microsoft, 2010) [downloadable]
- dinput : MS dinput.dll; breaks mouse, use only on Rayman 2 etc. (Microsoft, 2010) [downloadable]
- dirac : The Dirac directshow filter v1.0.2 (Dirac, 2009) [downloadable]
- directmusic : MS DirectMusic from DirectX user redistributable (Microsoft, 2010)

- [downloadable]
- `directplay` : MS DirectPlay from DirectX user redistributable (Microsoft, 2010) [downloadable]
- `directshow` : DirectShow runtime DLLs (amstream, qasf, qcap, qdvd, qedit, quartz) (Microsoft, 2011) [downloadable]
- `directx9` : MS DirectX 9 (Deprecated, no-op) (Microsoft, 2010) [downloadable]
- `dmband` : MS dmband.dll from DirectX user redistributable (Microsoft, 2010) [downloadable]
- `dmcompos` : MS dmcompos.dll from DirectX user redistributable (Microsoft, 2010) [downloadable]
- `dmime` : MS dmime.dll from DirectX user redistributable (Microsoft, 2010) [downloadable]
- `dmloader` : MS dmloader.dll from DirectX user redistributable (Microsoft, 2010) [downloadable]
- `dmscript` : MS dmscript.dll from DirectX user redistributable (Microsoft, 2010) [downloadable]
- `dmstyle` : MS dmstyle.dll from DirectX user redistributable (Microsoft, 2010) [downloadable]
- `dmsynth` : MS dmsynth.dll from DirectX user redistributable (Microsoft, 2010) [downloadable]
- `dmusic32` : MS dmusic32.dll from DirectX user redistributable (Microsoft, 2006) [downloadable]
- `dmusic` : MS dmusic.dll from DirectX user redistributable (Microsoft, 2010) [downloadable]
- `dotnet11sp1` : MS .NET 1.1 SP1 (Microsoft, 2004) [downloadable]
- `dotnet11` : MS .NET 1.1 (Microsoft, 2003) [downloadable]
- `dotnet20sp1` : MS .NET 2.0 SP1 (Microsoft, 2008) [downloadable]
- `dotnet20sp2` : MS .NET 2.0 SP2 (Microsoft, 2009) [downloadable]
- `dotnet20` : MS .NET 2.0 (Microsoft, 2006) [downloadable]
- `dotnet30sp1` : MS .NET 3.0 SP1 (Microsoft, 2007) [downloadable]
- `dotnet30` : MS .NET 3.0 (Microsoft, 2006) [downloadable]
- `dotnet35sp1` : MS .NET 3.5 SP1 (Microsoft, 2008) [downloadable]
- `dotnet35` : MS .NET 3.5 (Microsoft, 2007) [downloadable]
- `dotnet40_kb2468871` : MS .NET 4.0 KB2468871 (Microsoft, 2011) [downloadable]
- `dotnet40` : MS .NET 4.0 (Microsoft, 2011) [downloadable]
- `dotnet452` : MS .NET 4.5.2 (Microsoft, 2012) [downloadable]
- `dotnet45` : MS .NET 4.5 (Microsoft, 2012) [downloadable]
- `dotnet461` : MS .NET 4.6.1 (Microsoft, 2015) [downloadable]
- `dotnet462` : MS .NET 4.6.2 (Microsoft, 2016) [downloadable]
- `dotnet46` : MS .NET 4.6 (Microsoft, 2015) [downloadable]
- `dotnet471` : MS .NET 4.7.1 (Microsoft, 2017) [downloadable]
- `dotnet472` : MS .NET 4.7.2 (Microsoft, 2018) [downloadable]
- `dotnet48` : MS .NET 4.8 (Microsoft, 2019) [downloadable]
- `dotnetcore2` : MS .NET Core Runtime 2.1 LTS (Microsoft, 2020) [downloadable]
- `dotnet_verifier` : MS .NET Verifier (Microsoft, 2016) [downloadable]
- `dpvoice` : Microsoft dpvoice dpvvox dpvacm Audio dlls (Microsoft, 2002) [downloadable]
- `dsdmo` : MS dsdmo.dll (Microsoft, 2010) [downloadable]
- `dsound` : MS DirectSound from DirectX user redistributable (Microsoft, 2010) [downloadable]
- `dswave` : MS dswave.dll from DirectX user redistributable (Microsoft, 2010) [downloadable]
- `dx8vb` : MS dx8vb.dll from DirectX 8.1 runtime (Microsoft, 2001) [downloadable]
- `dxdiagn_feb2010` : DirectX Diagnostic Library (February 2010) (Microsoft, 2010) [downloadable]
- `dxdiagn` : DirectX Diagnostic Library (Microsoft, 2011) [downloadable]
- `dxdiag` : DirectX Diagnostic Tool (Microsoft, 2010) [downloadable]
- `dxtrans` : MS dxtrans.dll (Microsoft, 2002) [downloadable]
- `dxvk054` : Vulkan-based D3D11 implementation for Linux / Wine (0.54) (Philip Rebohle, 2017) [downloadable]
- `dxvk060` : Vulkan-based D3D11 implementation for Linux / Wine (0.60) (Philip Rebohle, 2017) [downloadable]
- `dxvk061` : Vulkan-based D3D11 implementation for Linux / Wine (0.61) (Philip Rebohle, 2017)

- [downloadable]
- dxvk062 : Vulkan-based D3D11 implementation for Linux / Wine (0.62) (Philip Rebohle, 2017) [downloadable]
- dxvk063 : Vulkan-based D3D11 implementation for Linux / Wine (0.63) (Philip Rebohle, 2017) [downloadable]
- dxvk064 : Vulkan-based D3D11 implementation for Linux / Wine (0.64) (Philip Rebohle, 2017) [downloadable]
- dxvk065 : Vulkan-based D3D11 implementation for Linux / Wine (0.65) (Philip Rebohle, 2017) [downloadable]
- dxvk070 : Vulkan-based D3D10/D3D11 implementation for Linux / Wine (0.70) (Philip Rebohle, 2017) [downloadable]
- dxvk071 : Vulkan-based D3D10/D3D11 implementation for Linux / Wine (0.71) (Philip Rebohle, 2017) [downloadable]
- dxvk072 : Vulkan-based D3D10/D3D11 implementation for Linux / Wine (0.72) (Philip Rebohle, 2017) [downloadable]
- dxvk080 : Vulkan-based D3D10/D3D11 implementation for Linux / Wine (0.80) (Philip Rebohle, 2017) [downloadable]
- dxvk081 : Vulkan-based D3D10/D3D11 implementation for Linux / Wine (0.81) (Philip Rebohle, 2017) [downloadable]
- dxvk090 : Vulkan-based D3D10/D3D11 implementation for Linux / Wine (0.90) (Philip Rebohle, 2017) [downloadable]
- dxvk091 : Vulkan-based D3D10/D3D11 implementation for Linux / Wine (0.91) (Philip Rebohle, 2017) [downloadable]
- dxvk092 : Vulkan-based D3D10/D3D11 implementation for Linux / Wine (0.92) (Philip Rebohle, 2017) [downloadable]
- dxvk093 : Vulkan-based D3D10/D3D11 implementation for Linux / Wine (0.93) (Philip Rebohle, 2017) [downloadable]
- dxvk094 : Vulkan-based D3D10/D3D11 implementation for Linux / Wine (0.94) (Philip Rebohle, 2017) [downloadable]
- dxvk095 : Vulkan-based D3D10/D3D11 implementation for Linux / Wine (0.95) (Philip Rebohle, 2017) [downloadable]

- `qdvd` : `qdvd.dll` (Microsoft, 2011) [downloadable]
- `qedit` : `qedit.dll` (Microsoft, 2011) [downloadable]
- `quartz_feb2010` : `quartz.dll` (February 2010) (Microsoft, 2010) [downloadable]
- `quartz` : `quartz.dll` (Microsoft, 2011) [downloadable]
- `quicktime72` : Apple QuickTime 7.2 (Apple, 2010) [downloadable]
- `quicktime76` : Apple QuickTime 7.6 (Apple, 2010) [downloadable]
- `riched20` : MS RichEdit Control 2.0 (`riched20.dll`) (Microsoft, 2004) [downloadable]

- `wmi` : Windows Management Instrumentation (aka WBEM) Core 1.5 (Microsoft, 2000) [downloadable]
- `wmp10` : Windows Media Player 10 (Microsoft, 2006) [downloadable]
- `wmp11` : Windows Media Player 11 (Microsoft, 2007) [downloadable]
- `wmp9` : Windows Media Player 9 (Microsoft, 2003) [downloadable]
- `wmv9vcm` : MS Windows Media Video 9 Video Compression Manager (Microsoft, 2013) [downloadable]
- `wsh57` : MS Windows Script Host 5.7 (Microsoft, 2007) [downloadable]
- `xact` : MS XACT Engine (32-bit only) (Microsoft, 2010) [downloadable]
- `xact_x64` : MS XACT Engine (64-bit only) (Microsoft, 2010) [downloadable]
- `xinput` : Microsoft XInput (Xbox controller support) (Microsoft, 2010) [downloadable]
- `xmllite` : MS xmllite dll (Microsoft, 2011) [downloadable]
- `xna31` : MS XNA Framework Redistributable 3.1 (Microsoft, 2009) [downloadable]
- `xna40` : MS XNA Framework Redistributable 4.0 (Microsoft, 2010) [downloadable]
- `xvid` : Xvid Video Codec (xvid.org, 2009) [downloadable]

## Winetricks: fonts

- `allfonts` : All fonts (various, 1998-2010) [downloadable]
- `andale` : MS Andale Mono font (Microsoft, 2008) [downloadable]
- `arial` : MS Arial / Arial Black fonts (Microsoft, 2008) [downloadable]
- `baekmuk` : Baekmuk Korean fonts (Wooderart Inc. / kldp.net, 1999) [downloadable]
- `calibri` : MS Calibri font (Microsoft, 2007) [downloadable]
- `cambria` : MS Cambria font (Microsoft, 2009) [downloadable]
- `candara` : MS Candara font (Microsoft, 2009) [downloadable]
- `cjkfonts` : All Chinese, Japanese, Korean fonts and aliases (Various, ) [downloadable]
- `comicsans` : MS Comic Sans fonts (Microsoft, 2008) [downloadable]
- `consolas` : MS Consolas console font (Microsoft, 2011) [downloadable]
- `constantia` : MS Constantia font (Microsoft, 2009) [downloadable]
- `corbel` : MS Corbel font (Microsoft, 2009) [downloadable]
- `corefonts` : MS Arial, Courier, Times fonts (Microsoft, 2008) [downloadable]
- `courier` : MS Courier fonts (Microsoft, 2008) [downloadable]
- `droid` : Droid fonts (Ascender Corporation, 2009) [downloadable]
- `eufonts` : Updated fonts for Romanian and Bulgarian (Microsoft, 2008) [downloadable]
- `fakechinese` : Creates aliases for Chinese fonts using Source Han Sans fonts (Adobe, 2019)
- `fakejapanese_ipamona` : Creates aliases for Japanese fonts using IPAMona fonts (Jun Kobayashi, 2008)
- `fakejapanese` : Creates aliases for Japanese fonts using Source Han Sans fonts (Adobe, 2019)
- `fakejapanese_vlgothic` : Creates aliases for Japanese Meiryō fonts using VLGothic fonts (Project Vine / Daisuke Suzuki, 2014)
- `fakekorean` : Creates aliases for Korean fonts using Source Han Sans fonts (Adobe, 2019)
- `georgia` : MS Georgia fonts (Microsoft, 2008) [downloadable]
- `impact` : MS Impact fonts (Microsoft, 2008) [downloadable]
- `ipamona` : IPAMona Japanese fonts (Jun Kobayashi, 2008) [downloadable]
- `liberation` : Red Hat Liberation fonts (Mono, Sans, SansNarrow, Serif) (Red Hat, 2008) [downloadable]
- `lucida` : MS Lucida Console font (Microsoft, 1998) [downloadable]
- `meiryō` : MS Meiryō font (Microsoft, 2009) [downloadable]
- `opensymbol` : OpenSymbol fonts (replacement for Wingdings) (OpenOffice.org, 2017) [downloadable]

- pptfonts : All MS PowerPoint Viewer fonts (various, ) [downloadable]
- sourcehansans : Source Han Sans fonts (Adobe, 2019) [downloadable]
- tahoma : MS Tahoma font (not part of corefonts) (Microsoft, 1999) [downloadable]
- takao : Takao Japanese fonts (Jun Kobayashi, 2010) [downloadable]
- times : MS Times fonts (Microsoft, 2008) [downloadable]
- trebuchet : MS Trebuchet fonts (Microsoft, 2008) [downloadable]
- uff : Ubuntu Font Family (Ubuntu, 2010) [downloadable]
- unifont : Unifont alternative to Arial Unicode MS (Roman Czyborra / GNU, 2019) [downloadable]
- verdana : MS Verdana fonts (Microsoft, 2008) [downloadable]
- vlgothic : VL Gothic Japanese fonts (Project Vine / Daisuke Suzuki, 2014) [downloadable]
- webdings : MS Webdings fonts (Microsoft, 2008) [downloadable]
- wenquanyi : WenQuanYi CJK font (wenq.org, 2009) [downloadable]
- wenquanyizenhei : WenQuanYi ZenHei font (wenq.org, 2009) [downloadable]

- `twfc` : Transformers: War for Cybertron (Activision, 2010)
- `typingofthedead_demo` : Typing of the Dead Demo (Sega, 1999)
- `ut3` : Unreal Tournament 3 (Midway Games, 2007)
- `wog` : World of Goo Demo (2D Boy, 2008) [downloadable]
- `wormsreloaded_demo_steam` : Worms Reloaded Demo (Steam) (Team17, 2010) [downloadable]

## Winetricks: prefix

- `apps`
- `benchmarks`
- `dlls`
- `fonts`
- `games`
- `settings`

## Winetricks: settings

- `alldlls=builtin` : Override most common DLLs to builtin
- `alldlls=default` : Remove all DLL overrides
- `ao=disabled` : Disable AlwaysOffscreen (default)
- `ao=enabled` : Enable AlwaysOffscreen
- `autostart_winedbg=disabled` : Prevent winedbg from launching when an unhandled exception occurs
- `autostart_winedbg=enabled` : Automatically launch winedbg when an unhandled exception occurs (default)
- `bad` : Fake verb that always returns false
- `cfc=disable` : Disable CheckFloatConstants (default)
- `cfc=enabled` : Enable CheckFloatConstants
- `csmt=off` : Disable Command Stream Multithreading
- `csmt=on` : Enable Command Stream Multithreading (default)
- `ddr=gdi` : Set DirectDrawRenderer to gdi
- `ddr=opengl` : Set DirectDrawRenderer to opengl
- `fontfix` : Check for broken fonts
- `fontsmooth=bgr` : Enable subpixel font smoothing for BGR LCDs
- `fontsmooth=disable` : Disable font smoothing
- `fontsmooth=gray` : Enable subpixel font smoothing
- `fontsmooth=rgb` : Enable subpixel font smoothing for RGB LCDs
- `forcemono` : Force using Mono instead of .NET (for debugging)
- `glsl=disabled` : Disable GLSL shaders, use ARB shaders (faster, but sometimes breaks)
- `glsl=enabled` : Enable GLSL shaders (default)
- `good` : Fake verb that always returns true
- `grabfullscreen=n` : Disable cursor clipping for full-screen windows (default)
- `grabfullscreen=y` : Force cursor clipping for full-screen windows (needed by some games)
- `gsm=0` : Set MaxShaderModelGS to 0
- `gsm=1` : Set MaxShaderModelGS to 1
- `gsm=2` : Set MaxShaderModelGS to 2

- `gsm=3` : Set MaxShaderModelGS to 3
- `heapcheck` : Enable heap checking with GlobalFlag
- `hidewineexports=disable` : Disable hiding Wine exports from applications (wine-staging)
- `hidewineexports=enable` : Enable hiding Wine exports from applications (wine-staging)
- `hosts` : Add empty C:\windows\system32\drivers\etc\{hosts,services} files
- `isolate_home` : Remove wineprefix links to /home/pc
- `macdriver=mac` : Enable the Mac native Quartz driver (default)
- `macdriver=x11` : Disable the Mac native Quartz driver, use X11 instead
- `mackeyremap=both` : Enable mapping `opt→alt` and `cmd→ctrl` keys for the Mac native driver
- `mackeyremap=left` : Enable mapping of left `opt→alt` and `cmd→ctrl` keys for the Mac native driver
- `mackeyremap=none` : Do not remap keys for the Mac native driver (default)
- `mimeassoc=off` : Disable exporting MIME-type file associations to the native desktop
- `mimeassoc=on` : Enable exporting MIME-type file associations to the native desktop (default)
- `multisampling=disabled` : Disable Direct3D multisampling
- `multisampling=enabled` : Enable Direct3D multisampling
- `mwo=disable` : Set DirectInput MouseWarpOverride to disable
- `mwo=enabled` : Set DirectInput MouseWarpOverride to enabled (default)
- `mwo=force` : Set DirectInput MouseWarpOverride to force (needed by some games)
- `native_mdac` : Override `odbc32`, `odbc32` and `oledb32`
- `native_oleaut32` : Override `oleaut32`
- `nocrashdialog` : Disable crash dialog
- `npm=repack` : Set NonPower2Mode to repack
- `nt351` : Set Windows version to Windows NT 3.51
- `nt40` : Set Windows version to Windows NT 4.0
- `orm=backbuffer` : Set OffscreenRenderingMode=backbuffer
- `orm=fbo` : Set OffscreenRenderingMode=fbo (default)
- `psm=0` : Set MaxShaderModelPS to 0
- `psm=1` : Set MaxShaderModelPS to 1
- `psm=2` : Set MaxShaderModelPS to 2
- `psm=3` : Set MaxShaderModelPS to 3
- `remove_mono` : Remove builtin wine-mono
- `rtlm=auto` : Set RenderTargetLockMode to auto (default)
- `rtlm=disabled` : Set RenderTargetLockMode to disabled
- `rtlm=readdraw` : Set RenderTargetLockMode to readdraw
- `rtlm=readtex` : Set RenderTargetLockMode to readtex
- `rtlm=texdraw` : Set RenderTargetLockMode to texdraw
- `rtlm=textex` : Set RenderTargetLockMode to textex
- `sandbox` : Sandbox the wineprefix - remove links to /home/pc
- `sound=alsa` : Set sound driver to ALSA
- `sound=coreaudio` : Set sound driver to Mac CoreAudio
- `sound=disabled` : Set sound driver to disabled
- `sound=oss` : Set sound driver to OSS
- `sound=pulse` : Set sound driver to PulseAudio
- `strictdrawordering=disabled` : Disable StrictDrawOrdering (default)
- `strictdrawordering=enabled` : Enable StrictDrawOrdering
- `usetakefocus=disabled` : Disable UseTakeFocus (default)
- `usetakefocus=enabled` : Enable UseTakeFocus
- `vd=1024×768` : Enable virtual desktop, set size to 1024×768
- `vd=1280×1024` : Enable virtual desktop, set size to 1280×1024
- `vd=1440×900` : Enable virtual desktop, set size to 1440×900

- `vd=640x480` : Enable virtual desktop, set size to 640x480
- `vd=800x600` : Enable virtual desktop, set size to 800x600
- `vd=off` : Disable virtual desktop
- `videomemorysize=1024` : Tell Wine your video card has 1024MB RAM
- `videomemorysize=2048` : Tell Wine your video card has 2048MB RAM
- `videomemorysize=512` : Tell Wine your video card has 512MB RAM
- `videomemorysize=default` : Let Wine detect amount of video card memory
- `vista` : Set Windows version to Windows Vista
- `vsm=0` : Set MaxShaderModelVS to 0
- `vsm=1` : Set MaxShaderModelVS to 1
- `vsm=2` : Set MaxShaderModelVS to 2
- `vsm=3` : Set MaxShaderModelVS to 3
- `win10` : Set Windows version to Windows 10
- `win20` : Set Windows version to Windows 2.0
- `win2k3` : Set Windows version to Windows 2003
- `win2k8r2` : Set Windows version to Windows 2008 R2
- `win2k8` : Set Windows version to Windows 2008
- `win2k` : Set Windows version to Windows 2000
- `win30` : Set Windows version to Windows 3.0
- `win31` : Set Windows version to Windows 3.1
- `win7` : Set Windows version to Windows 7
- `win81` : Set Windows version to Windows 8.1
- `win8` : Set Windows version to Windows 8
- `win95` : Set Windows version to Windows 95
- `win98` : Set Windows version to Windows 98
- `windowmanagerdecorated=n` : Prevent the window manager from decorating windows
- `windowmanagerdecorated=y` : Allow the window manager to decorate windows (default)
- `windowmanagermanaged=n` : Prevent the window manager from controlling windows
- `windowmanagermanaged=y` : Allow the window manager to control windows (default)
- `winme` : Set Windows version to Windows ME
- `winver=` : Set Windows version to default (win7)
- `winxp` : Set Windows version to Windows XP

## Troubleshooting

### System "freezes" when installing a winetricks

Depending on the winetricks you want to install you may run into the issue that the system seems to freeze on the remote command line. Before giving up you should take a look on your Batocera screen. It may ask you to interact.

Example: If you want to install the `vcrun2017` the system seems to freeze at this point:

```
0104:fixme:oleacc:find_class_data unhandled window class: L"Button"
```

So you may think it fails to install but instead there's the according package setup appearing on the Batocera screen waiting for you to interact:

### Setup menu

1)  
A wineprefix is the folder Batocera creates automatically on the filesystem when launching the installer on the game, or when launching a game for the first time, its name will end with `.wine`

2)  
You need to put the absolute path to the `.wine` folder, for example  
`/userdata/saves/windows/lutris/game.pc.wine` or  
`/userdata/saves/windows/proton/game.pc.wine` or  
`/userdata/roms/windows/game.wine`
