Navigation

For those not as familiar with all the terminology used in the sidebar, this page offers links to laconic explanations for most pages (why they exist and what you should look for).

How to install Batocera and set up all your ROMs/BIOS files:

- Getting Started

Information about the systems that can be emulated within Batocera:

- Emulators & Ports

Devices that you can install Batocera onto and their supported hardware:

- Supported Devices

What controllers are compatible with Batocera and how they are configured:

- Controllers

The front-end menu that Batocera uses:

- EmulationStation

The different ways you can store your files:

- File Management

Having trouble and/or something isn't working as intended?

- Help/Support & Releases

Users who are more familiar with typical Linux distributions may want to check this out:

- Advanced Users
- Advanced EmulationStation
- Scripting
