

Welcome to the Batocera.linux Wiki

Please select one of the top-level topics from [the main menu on the left hand side](#), or use the search box in the upper right corner.

All pages are written in English, but you can use *Google Translate* from the menu at the top if you are more comfortable with a different language. Or if you want a good laugh with some funky translation 😊, keep in mind some informations that shouldn't be translated (like paths) might be translated as well when using this.

If you don't find relevant information here, you can also try:

- The [Batocera.org](#) main web site
- Our [Discord](#) channel
- The [Facebook](#) official page
- Our official [Twitter](#) feed
- Last but not least, if you want to support the project, please [consider a donation through Paypal](#). Thank you!

“Why is this thing called Batocera?” – Because the creator of this project is an [enthusiastic entomologist](#) 🦋, and his son's favorite insect is a [batocera](#) 🐛.
