

Welcome to the Batocera documentation!

Select one of the top-level topics from the main menu on the left hand side (up top if on mobile) or use the search box in the upper right corner. If new to emulation or Linux-based operating systems, use the navigation page, which offers short descriptions of each page title.

All pages are written in English. Use the Google Translate function from the menu at the top if more comfortable with a different language (or want a good laugh with some funky translation 😉). Keep in mind some information that should not be translated (like option names) might be translated as well when using this.

If the relevant information is not found here, try the:

- main website
- Discord channel
- official Batocera subreddit
- official Facebook page
- official Twitter feed

Last but not least, if you want to support the project, please consider a donation through Paypal. Thank you!

"Why is this thing called Batocera?" – Because the creator of this project is an enthusiastic entomologist, and his son's favorite insect is a batocera.
