Amiga CDTV

The CDTV is a home entertainment console developed by Commodore. It was released in 1991.

Essentially, it is an [Amiga 500](#) computer with a CD-ROM drive and remote control. Attaching a keyboard, mouse and floppy disk drive would make it have the same functionality as the Amiga 500. The system was marketed as “CDTV”, without the “Amiga” branding at the front.

Aimed at non-tech savvy users who were still interested in interactive software, one of its flagship titles was the Grolier encyclopedia.

The CDTV was a commercial failure, and didn't even reach hundred titles being released for the console (most of them being ports from the Amiga 500 anyway). It would be succeeded by the [Amiga CD32](#), with some of the CDTV's title being compatible with it.

This system scrapes metadata for the “amigacdtv” group(s) and loads the amigacdtv set from the currently selected theme, if available.

Quick reference

- **Accepted ROM formats:** .bin, .cue, .iso, .chd, .m3u
- **Folder:** /userdata/roms/amigacdtv

fsuae configuration

Standardized features available to all cores of this emulator: `amigacdtv.videomode`, `amigacdtv.ratio`, `amigacdtv.padtokeyboard`, `amigacdtv.decoration`

RetroArch

[RetroArch](#) (formerly SSNES), is a ubiquitous frontend that can run multiple “cores”, which are essentially the emulators themselves. The most common cores use the [libretro](#) API, so that's why cores run in RetroArch in Batocera are referred to as “libretro: (core name)”. RetroArch aims to unify the feature set of all libretro cores and offer a universal, familiar interface independent of platform.

RetroArch configuration

RetroArch offers a **Quick Menu** accessed by pressing [HOTKEY] +  which can be used to alter various things like [RetroArch and core options](#), and [controller mapping](#). Most RetroArch related settings can be altered from Batocera's EmulationStation.

Standardized features available to all libretro cores: `amigacdtv.videomode`, `amigacdtv.ratio`, `amigacdtv.smooth`, `amigacdtv.shaders`, `amigacdtv.pixel_perfect`, `amigacdtv.decoration`, `amigacdtv.game_translation`
