

Enterprise 64/128

The Enterprise is a Zilog Z80 based home computer announced in 1983, but due to a series of delays was not commercially available until 1985. It was most successful in the UK and Hungary, with its innovative use of custom ASICs for graphics and sound which took workload away from the main CPU.

Quick reference

- **Accepted ROM formats:** .bas, .com, .zip
- **Folder:** /userdata/roms/enterprise

Emulators

[CLK Clock Signal](#)

BIOS

MD5 checksum	Share file path	Description
e972fe42b398c9ff1d93ff014786aec6	bios/Enterprise/basic21.bin	Required
f36f24cbb87745fbd2714e4df881db09	bios/Enterprise/exos21.bin	Required

ROMs

Place your Enterprise basic or cartridge ROMs in /userdata/roms/enterprise.

The CLK emulator requires the BIOS files listed above. It can also support other Basic and Exos versions, but these are the most common.

Games that require zrom are not supported at this time.

Emulators

CLK

[CLK aka Clock Signal](#) is a multi-system emulator that is focused on low-latency emulation. It emulates Enterprise and a bunch of other old computers.

Controls

Most Enterprise games are played with the keyboard, or need a keyboard to start a game. There is a minimal [pad2key](#) configuration provided that emulates the internal joystick of the Enterprise, but if

you use only a joystick, you will most probably have to remap the keyboard to play your game.

Troubleshooting

Further troubleshooting

For further troubleshooting, refer to the [generic support pages](#).
