

Sega Lindbergh

LINDBERGH™

The Sega Lindbergh is an arcade developed by Sega. It was launched in 2005. Designed to be the successor to the [Sega NAOMI 2](#), Lindbergh is the first arcade machine of many to be based on PC architecture with linux OS instead of a home console based on Xbox 360. Features arcade games like After Burner Climax, House of the Dead 4 and OutRun 2 SP SDX.

Five variants were made, each with their own color: Yellow, Red, Red EX, Blue and Silver. For more information about this arcade machines, [the article on Sega Retro provides much of it](#).

This system scrapes metadata for the "lindbergh" and "arcade" groups and loads the Lindbergh set from the currently selected theme, if available.

Quick reference

- **Emulator:** [Sega Lindbergh loader](#)
- **Folder:** /userdata/roms/lindbergh
- **Accepted ROM formats:** .game

BIOS

No Sega Lindbergh emulator in Batocera needs a BIOS file to run.

ROMs

Lindbergh loader doesn't allow any space in file or folder name. Use underscore instead.

Place your Sega Lindbergh ROMs in /userdata/roms/lindbergh. For Batocera to detect a game, you must have a blank file with '.game' extension in the location where the rom will execute from. For best compatibility, use game ID from the working games list below as the file name.

i.e.: for Ghost Squad Evolution game, create ghostev.game in the /userdata/roms/lindbergh/Ghost_Squad_Evolution/vsg_l directory.

Some games (mostly driving) require extra options in the test menu. You can skip it by making sure your game has the **exact same revision** (e.g.: initiad5exa.game if you have Initial D 5 (Export) (2.0)) as mentioned in the game list below.

Emulators

Sega Lindbergh loader

As of Batocera v42, the Lindbergh system is supported, including light gun and steering wheel devices (force feedback not yet supported).

If you experience control issues with your controller in a game, try enabling SDL2 controller mode.

Games list

Name	Executable file	Version	Revision	ID	Genre	Working ?	Notes
2 Spicy	apacheM.elf			2spicy	Gun	✓	Left/right d-pad on light guns to go left/right

Game specific notes

Ghost Squad Evolution

DISPLAY: There is actually no resolution patch at the moment. Game display is limited to 640×480. Crashes were reported. **There is no fix yet.**

Initial D 4/5 series

CARD READER ERROR: To bypass card reader check, enable it in emulation station advanced settings.

CONTROLS: Steering control is very sensitive. **There is no fix yet.**

Let's Go Jungle!

CONTROLS: aiming sensitivity is very high. To reduce this, launch the game in test mode, then go to gun calibration and calibrate the entire screen. Save and quit.

If playing with one light gun, P2 action button is `ACTION` (secondary button).

Let's Go Jungle! Special

CONTROLS: If playing with one light gun, both action buttons are on the dpad. Left dpad for P1 action; right dpad for P2 action.

Virtua fighter 5 Final Showdown

DISPLAY: If you have a black screen, limit video mode resolution to 1080p.

Lindbergh loader configuration

Setting name	Group name	Description
FREE PLAY lindbergh_freeplay		Enable free play for supported games ⇒ Off 0, On 1.
REGION lindbergh_region		Choose the arcade machine console region. May be required to start the game. ⇒ Japan JP, United States US, Export EX.
ASPECT RATIO lindbergh_aspect		Set to keep the aspect ratio (4:3) in games like Sega Race TV and Primeval Hunt. ⇒ Off 0, On 1.
FPS LIMITER lindbergh_limit		Set if you want to limit the FPS in games that are not limited like OutRun2. ⇒ Off 0, On 1.
FPS TARGET lindbergh_fps		Set the target FPS (will only work if FPS LIMITER is enabled). ⇒ 30fps 30, 50fps 50, 60fps (Default) 60, 75fps 75, 100fps 100, 120fps 120.
CONTROLLER MODE lindbergh_controller		Choose the controller configuration. EVDEV for a wide range of controllers, lightguns & steering wheels. SDL2 for gamepads only. ⇒ SDL2 1, EVDEV (default) 2
HUMMER FLICKER FIX lindbergh_hummer	Game options	Set to on if you experience flickering in Hummer. ⇒ Off 0, On 1.
OUTRUN LENS GLARE lindbergh_outrun	Game options	Set to enable lens glare in Outrun 2. ⇒ Off 0, On 1.
BOOST RENDER RES lindbergh_boost	Game options	Upscale rendering resolution to display size. ⇒ Off 0, On 1.
PRIMEVAL HUNT MODE lindbergh_hunt	Game options	Set the Primeval Hunt mode (touch screen). ⇒ No touch screen 1, side by side 2, 3DS mode (right side) 3, 3DS mode (bottom side) 4
CARD READER lindbergh_card	Game options	Enable to emulate the card reader for supported games (e.g.: Virtua Tennis 3 and R-Tuned) ⇒ Off 0, On 1.
CPU SPEED lindbergh_cpu	Game options	House of the Dead 4 speed fix. Sets the game to the CPU minimum frequency of your processor. ⇒ Off 0, On 1.
IP ADDRESS lindbergh_ip	Game options	Enable the IP address for supported games (e.g.: OutRun 2) network play against another PC on the same network. ⇒ Off 0, On 1.
RUN TEST MODE lindbergh_test	Advanced options	Run the game in test mode to configure certain game options. ⇒ Off 0, On 1.

Setting name	Group name	Description
USE ZINK FOR RENDERING lindbergh_zink	Advanced options	Fixes some shadows and textures in Virtua Tennis 3 and Virtua Fighter 5 franchise for non Nvidia GPUs. May need the FPS limiter option enabled. ⇒ Off 0, On 1.
DEBUG MODE lindbergh_debug	Advanced options	Add debug logging to help troubleshoot issues. ⇒ Off 0, On 1.
