

# Atari Lynx

The Atari Lynx was a fourth-generation handheld game console released by Atari on September 1, 1989 and it retailed for \$179.99. It has a WDC 65SC02 CPU. Notably, it was the world's first handheld system that used a color LCD screen, as well as having fairly advanced graphics for the time.

<b>shortname</b>	lynx
<b>emulator/core(s)</b>	libretro/mednafen_lynx
<b>rom format(s)</b>	.lnx .zip .7z

## Emulators

### libretro/mednafen\_lynx

Beetle Lynx is an Atari Lynx video game system emulator that can be used as a libretro core. Specifically it's a port of Mednafen Lynx which is a fork of Handy.

## ROMs

Place your Atari Lynx ROMs in /userdata/roms/lynx/.

## Controls

The default button mapping to the Lynx is as following:
