REminiscence

Port of Gregory Montoir's Flashback emulator, running as a libretro core.

Quick reference

- **Emulator:** RetroArch
- **Cores available:** libretro:reminiscence
- **Folder:** `/userdata/roms/reminiscence`
- **Accepted ROM formats:** `.rem`

ROMs

Place your REminiscence ROMs in `/userdata/roms/reminiscence`.

```
reminiscence/
├── DATA
│   ├── ACGUIT1A.INS
│   ├── ACOUSTI.INS
│   ├── ALIMPONT.CMD
│   ├── ALIMPONT.POL
...
│   ├── SERRURE.POL
│   ├── STRING2.INS
│   └── SYNTH1.INS
├── Flashback - The Quest for Identify.rem
```

Create an empty file `Flashback - The Quest for Identify.rem` and the core should run (this is the PC version).
