

# Interton Video Computer 4000

## VIDEO COMPUTER VC4000

The Interton Video Computer 4000 (officially abbreviated as Interton VC 4000) is an early 8-bit ROM cartridge-based second-generation home video game console that was released in Germany, England, France, Spain, Austria, the Netherlands and Australia in 1978 by German hearing aid manufacturer Interton. The console is quite obscure outside Germany, but many software-compatible systems can be found in numerous European countries. The console is the successor of the Interton Video 3001 and was sold for 298 Deutsche Mark and discontinued in 1983.

This system scrapes metadata for the “vc4000” group and loads the vc4000 set from the currently selected theme, if available.

### Quick reference

- **Emulator:** [MAME](#)
- **Emulator:** [RetroArch](#)
- **Core:** [libretro: mame](#)
- **Folder:** /userdata/roms/vc4000
- **Accepted ROM formats:** .bin .rom .pgm .tvc .zip .7z

### BIOS

No VC4000 emulator in Batocera needs a BIOS file to run.

### ROMs

Place your VC4000 ROMs in /userdata/roms/vc4000.

### Emulators

#### RetroArch

[RetroArch](#) (formerly SSNES), is a ubiquitous frontend that can run multiple “cores”, which are essentially the emulators themselves. The most common cores use the [libretro](#) API, so that's why cores run in RetroArch in Batocera are referred to as “libretro: (core name)”. RetroArch aims to unify the feature set of all libretro cores and offer a universal, familiar interface independent of platform.

## RetroArch configuration

RetroArch offers a **Quick Menu** accessed by pressing [HOTKEY] +  which can be used to alter various things like [RetroArch and core options](#), and [controller mapping](#). Most RetroArch related settings can be altered from Batocera's EmulationStation.
